

State Insurance Regulatory COVID-19 Updates

* In recent weeks, state insurance regulators have been issuing emergency regulations, guidance documents, and press releases to assist regulated entities regarding the provision of insurance-related services during the novel coronavirus (COVID-19) outbreak. **The recent updates denoted below in red include:**

- [Arizona](#) issued a Press Release providing guidance with respect to coverage under travel insurance policies.
- [Iowa](#) issued a set of Frequently Asked Questions that identifies the carriers that have committed to waive cost-sharing for COVID-19 testing, among other things.
- [Maine](#) issued a Bulletin detailing emergency measures for all insurers offering health plans in the state.
- [Massachusetts](#) issued a Bulletin announcing a special enrollment period to permit individuals currently without insurance to enroll in coverage.
- [Michigan](#) issued a Press Release announcing expanded access to telemedicine for Medicaid beneficiaries, among other things.
- [North Carolina](#) issued a Bulletin to assist insurers regarding the provision of insurance-related services during the COVID-19 public health emergency.
- [Pennsylvania](#) issued a Notice to assist entities regulated by the Insurance Department in addressing insurance-related services that may arise in the context of the COVID-19 outbreak.
- [South Carolina](#) issued a Press Release identifying which insurers in the state are covering testing and screening.

* Many of the states have issued bulletins that contain the following information:

- **Information Access.** Asks insurers to inform insureds of available benefits, quickly respond to insured inquiries, and consider revisions needed to streamline response and benefits for insureds.
- **Testing.** Requests/requires insurers to waive cost-sharing for (1) COVID-19 testing and (2) in-network provider office visits, urgent care center visits, and emergency room visits.
- **Telehealth Delivery of Services.** Reminds insurers to ensure their telehealth programs are robust and will be able to meet increased demand.
- **Network Adequacy and Access to Out-of-Network Services.** Requests insurers to verify their provider networks are adequate to handle a potential increase in the need for health care services and requests insurers that do not have a provider in their networks with the appropriate training/experience to meet the health care needs of insureds make exceptions to provide access to an out-of-network provider at the in-network cost-sharing level.
- **Immunizations.** In the event an immunization becomes available, requests that insurers immediately cover the immunization at no-cost sharing.
- **Access to Prescription Drugs.** Asks insurers to make expedited formulary exceptions in certain circumstances and requests that insurers allow insureds to fill and refill prescription medications for up to a 90-day supply/until the prescription expires.

Not every state has followed this model and some states deviate in important respects (e.g., by specifically addressing surprise billing, ambulance services, etc.). The below survey details the available state resources, the date on which the resources were issued, and a brief summary offering a general overview of the guidance offered. In particular, it focuses on cost-sharing waivers, telehealth services, treatment of out-of-network providers offering in-network services, etc.

* We envision this as an evergreen document that we will aim to update **daily**. If you operate in a state and notice that we have not included the most up-to-date

guidance, please let us know.
