

State Legislative Action on Business Interruption Coverage

* In recent weeks, state legislatures have introduced bills seeking to expand coverage under business interruption policies in response to the novel coronavirus (COVID-19) outbreak.

* We will provide daily updates documenting any relevant new bills and the current procedural posture of existing legislation. Today's actions include:

- Pennsylvania introduced a bill, HB 2759, which requires all business interruption policies in place when a proclamation of disaster is issued to cover all business interruption losses that result from the proclamation.

* Most states that have introduced legislation on this subject follow this general framework:

- Require business interruption due to the threat posed by COVID-19 to be construed as a “covered peril” under policy;
- Require indemnification of the insured for any loss of business/business interruption during a COVID-19-related state of emergency; and
- Define the policies to which the expansion applies (e.g., policies covering insureds who have less than 100 employees, policies in place during a certain time period, etc.).

Not every state has followed this model and some states deviate in important respects (e.g., application to all insureds, etc.).

* If you operate in a state and notice that we have not included the most up-to-date legislative developments, please let us know.
